

Episcopal Resource Center Report 2013

Your Resource Center has had a busy year. As a joint project with both dioceses, we offered three open houses during the year. Topics on display were curriculum, vacation bible school, Lent/Easter, stewardship, intergenerational activities, and Advent/Christmas dramas and pageants.

Our major project for the year was to upgrade our library software. We are now officially “in the cloud” and the old server has now been recycled. The [online catalog](#) has a new design with lots of added features such as book covers, summaries, book reviews, many of which come from *School Library Journal* and *Publishers Weekly*. The library crew spent six hours in a training session to acquaint us with the new program. Many new features, including renewing a book or reserving material online, will be added in the next year

There are 369 parishes/members using our collection. The Diocese of California, the Diocese of El Camino Real, and St. Thomas Episcopal Church provide financial support to the Resource Center.

We would love to see you in the Resource Center. Be sure to check the [online catalog](#).

We are staffed Tuesday and Thursday mornings. Call if this time is not convenient for you.

We are always happy to mail to you – free. We ask you to pay for return shipping. It is difficult to mail the large VBS programs but other things are happily sent. Let us know what you would like.

Please let us know if you would like to be added to our Resource Center email list. For further info, please contact:
